

ENERG8TE™

BMS CONTROLS FOR ENERGY STORAGE

The ENERG8TE™ BMS Controller is a high-performance control solution designed to ensure efficient battery management of your Energy Storage System (ESS).

CONTAIN YOUR ENERGY

Rated to the highest level of Functional Safety, targeted for UL9540 and tailored for use in diverse energy environments, the ENERG8TE™ seamlessly integrates with various energy sources.

SAFETY BY DESIGN

ENERG8TE™ provides capability for your team to incorporate data logging, diagnostic capabilities, including fail safes and prevention measures to mitigate risks associated with battery operation.

SCALABLE + FLEXIBLE

Hardware platform that enables software algorithm implementation for SoX, Cell balancing, charging and discharging.

FUTURE-ORIENTED DESIGN

As ESS Technologies advance, the ENERG8TE is designed to adapt, ensuring compatibility and long-term value.
